SUMMARY

Ambitious and analytically minded MBA professional with a solid foundation in Computer Applications (BCA). Combines hands-on experience in IT management, operations, and data administration with a strong technical toolkit including Excel, SQL, and ERP systems. Proven track record of optimizing workflows, analyzing project costs, and building dashboards to drive data-backed business insights. Seeking a challenging role in Data Analytics or IT Management.

WORK EXPERIENCE

IT Management Trainee (Internship)

RK DEVI MEMORIAL HOSPITAL | [May 2026 – June 2026]

- Coordinated IT project workflows and assisted in aligning technology solutions with business strategies.
- Analyzed system requirements, monitored IT infrastructure performance, and supported data management tasks.
- Collaborated with cross-functional teams to streamline internal operations and improve technical efficiency.
- Maintained documentation for IT processes, software assets, and system configurations.

Data Management Executive | Excel net (2020-2022)

- Managed student and financial data using Excel
- Maintained records of fees, payments, and accounts
- Generated reports for performance and revenue tracking
- Ensured data accuracy and proper documentation

Assistant Operations Manager | Ratan Housing (2023–2025)

- Assisted in managing end-to-end operations and project execution
- Analyzed cost, resource, and timeline data to support business decisions
- Monitored budgets and identified cost optimization opportunities
- Prepared performance reports and operational insights
- Coordinated with teams to improve efficiency and workflow

PROJECTS

Hospital ERP & EMR Software Implementation

- System Implemented: Netram Hospital Information System (HIS)
- Role: IT Project Management & Implementation Lead (Internship Project)
- Successfully assisted in the end-to-end deployment of a specialized Hospital ERP and Electronic Medical Record (EMR) system to digitize clinical operations.
- Map out and configured patient flow management and automated token queuing modules, significantly reducing patient waiting times and streamlining OPD workflows.
- Managed the database transitions for electronic medical histories, helping the healthcare facility shift toward structured, paperless data tracking while ensuring data integrity.
- Coordinated the rollout of specialized modules across the facility, including pharmacy inventory management, billing, and optical shop operations.
- Conducted change management and cross-functional training sessions for doctors, clinical staff, and administrative receptionists to ensure seamless system adoption.

Student Fee & Performance Analysis Dashboard

- Developed a student data management and fee analysis system using MS Excel
- Collected and organized student records including attendance, fees, and performance
- Analyzed fee payment trends and identified pending dues
- Created dashboards to track revenue, student performance, and attendance patterns
- Generated reports to support decision-making and improve operational efficiency

Construction Project Cost & Resource Optimization Analysis

- Analyzed construction project data including costs, timelines, and resource allocation using MS Excel
- Identified cost-saving opportunities and optimized resource utilization
- Monitored project progress and compared planned vs actual performance
- Created dashboards to track expenses, efficiency, and project delays
- Provided insights to improve decision-making and operational performance

EDUCATION

Bachelor of Computer Applications | CSJM University | 2020-2023

Master of business administration | CSJM University | Pursuing

Skills

- Management
- Problem solving
- Communication
- Leadership
- SQL

- MS office
- Tally
- Networking
- POWER BI

CERTIFICATIONS

- Master diploma in computer information | 2018-2020
